

1-5 Dominic says: *I like these types of puzzles.
Try drawing some yourself.*

1. Look steadily at the short horizontal bar for a few seconds. What do you see?

Do the dots look as if they have moved to a different position?

Look at the left drawing and then its upside-down version on the right. Does it make a difference in what you perceive?

2. Look steadily at the beehive for a few seconds.

Where is the opening to the box?
