

1-6 Dominic asks: *Did you know these seven facts? If not, you soon will!*

1. Everything starts in your brain—with a thought.
2. Humans are more alike than they are different, regardless of skin color, race, language, male or female, tall or short, or where they live on Planet Earth.
3. Each brain is also unique because every thought you think changes the brain, and no two humans ever think identical thoughts.
4. All human brains are the same color. So is all human blood.
5. You talk to yourself inside your brain every waking minute.
6. How you act depends on what you think and what you tell yourself.
7. Creatures also “think,” but not in the same way as humans.

What do you imagine the boy and the squirrel are thinking?
