

**3-7 Caesar says:**

*Your brain has only its own perspective.*

*Typically, that's quite subjective.*

*Take a moment as detective—*

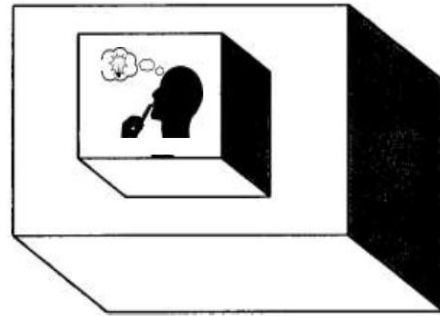

*You can be a bit reflective.*

A. Look at this illusion.

What does your brain see?

A set of boxes? A painting  
on the back wall? Or what?

\_\_\_\_\_

B. One piece of paper is unique. How quickly can your brain find it?
